Wise Noodle Cooker Series

- Once "one-touch" cooking operation program finishes, basket will lift up automatically. This function is especially efficient for user during rush hours to avoid excessively longer or shorter cooking time.
- LED digital clearly indicates temperature and time, which is controlled by microcomputer, and ensures best cooking outcomes.
- All channels have time extension function for extra food portions by certain percentage. After setting temperature and cooking time for each "one-touch" will start the cooking process automatically according to the setting.
- Warming temperature of water can be set in advance.
- After turning on the appliance or finishing the cooking task, the appliance will return to warming mode and can energy saving for preparing the next operation at the same time.
- Cooking temperature and time can be checked, °C&°F can be switched anytime during operation.
